Tuesday, July 13, Wednesday 14 and Thursday 15, 2010

8:00am-5:00pm NCCER ITCP Training \$100.00

NCCER has developed the Instructor Certification Training Program (ICTP) as part of the accreditation process. This program ensures the uniform and consistent delivery of training. This program is fully explained during this training. This network of certified instructors assures that NCCER training programs meet the standards of instruction set by the construction industry.

Tuesday, July 13

9:00am-4:00pm TDLR Cosmetology Instructor Class \$25.00

A 6 hour course providing all requirements to meet TDLR Cosmetology Instructor license renewal. Hours are good for 2 years.

Tuesday, July 13

9:00am-12:00pm CTE TEKS Module IV, Chapter 127, Career Preparation, for ALL CTE Teachers

Must register

No Additional Fee

OR: Wednesday, July 14, 4:00pm-7:00pm

It is "Highly recommended by TEA that ALL CTE teachers take CTE TEKS training modules prior to the 2010-2011 school year. All CTE teachers are to attend Module IV. Modules I, II & III are available online. Bring your laptop for use in this session with a CD you will be issued.

Tuesday, July 13

9:00am-5:00pm SkillsUSA Advanced CMI Training \$145.00 (does not include morning break & lunch)

This seven-hour workshop is designed for educators who have previously attended the CMI Basic Seminar or have previous experience as a SkillsUSA advisor. Through group interaction and hands-on experiences, participants will learn to identify and develop effective chapter management techniques, such as incorporating Chapter Activity Planner and Personal Leadership Inventory, developing an effective Program of Work, and facilitating activities using the Cycle of Learning. Participants learn how to direct lessons using adolescent leadership research, as well as observe and conclude how management techniques apply to activities. Additionally, they will practice strategies for the inclusion of relevant stakeholders, such as including parents and alumni in chapter events or involving business partners in professional development activities. This is a must for those educators wanting to boost chapter effectiveness.

As a participant in the CMI Advanced Seminar, you receive the following materials:

Advisor's Success Kit (ASK) CD-ROM

The SkillsUSA Leadership Handbook

The SkillsUSA Championships Technical Standards CD Package

Chapter Materials Design , m ,mmStudio CD-ROM

National Leadership and Skills Conference Video Scrapbook DVD

**Based on a minimum of 25 participants*

Tuesday, July 13

1:00pm-5:00pm Presentation Skills for Educators No Additional Fee

Do you recall your most exceptional teachers? It’s likely the teachers you are calling to mind had outstanding presentation skills. Today’s classrooms are interactive. They are filled with students who expect learning to be interesting, organized and thought-provoking. This educational session is designed to help you gain ways to make sure your classroom presentations meet your students’ high expectations. You will explore the elements that go into delivering an effective presentation and go home with a self-assessment rubric that will help you continue your path to excellence. In addition resumé, cover letter, and interview competencies will be shared as a value added bonus. Plan now to have this session jump-start your teaching efforts.

Tuesday, July 13, 1:00pm-6:00pm Earn Your Lifetime 10 Hour OSHA Card

Wednesday, July 14, 7:30am-12:30pm

The OSHA Outreach Training Program is OSHA's primary way to train workers in the basics of occupational safety and health. The OSHA 10 Hour Outreach Training Programs were developed by the OSHA Training Institute with the intent to assist employers in training and introducing employees to the basic practices of identifying, reducing, eliminating and reporting hazards associated with their work.

Over the past three years, over 1.3 million students have received training through this program.

Wednesday, July 14

8:00am-5:00pm Robotics Hands-On Workshop and Introduction to VEX Hardware \$400.00

Attend this dynamic presentation and see how math and science skills are integrated with technology education and see how students experience the building and programming of a robot. The presentation will show how students will:

Progress through the unit by constructing the Vex robot, the BaseBot; learn to use basic assembly tools and identify available Vex robotic components from the classroom inventory system; Test and troubleshoot the robot, and learn how to operate the robot using radio control in both Arcade and Tank style.

See how students will learn programming and will: Understand the differences between RC control of the robot and autonomous control.

See how to introduce the student to programming. EasyC, the block style programming language for Vex, is introduced. Learn about fundamental programming concepts like loops, statements, variables, constants and assignments are reinforced.

Create simple programs to command the robot to go forward, backward, left and right.

Write operator control programs and autonomous programs

Add digital bumper switches to the BaseBot so that it can interpret its environment autonomously

<u>Included in Workshop</u>	<u>Description</u>	<u>Price</u>	<u>Price</u>
